

## HOW DO YOU GET STARTED?

El Paso Electric Residential incentives are available to Texas customers through a Participating Contractor. It's easy when you follow these simple steps:

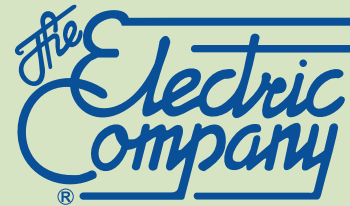

- 1 Select the energy efficiency home improvement project you are interested in.
- 2 Contact a Participating Contractor directly for information and a free, written quote.
- 3 The contractor you select will see if you qualify for greater incentive through the Income Qualified Energy Efficiency Program.
- 4 You only pay the balance. Enjoy a more comfortable home and lower energy bills!

El Paso Electric recommends getting a minimum of three quotes from participating contractors. The Participating Contractor List is available at [epesavings.com](http://epesavings.com) or call the Energy Efficiency Hotlines at (915) 255-4300 or (915) 521-4488.

Reduce energy bills and *improve the comfort of your home.*

# BRING THE SAVINGS HOME

Reduce your home energy bills and save money with energy efficiency.

## Did you know?

**El Paso Electric provides energy efficiency incentives to reduce the cost of the project and to help lower energy bills in the months to come.**

**Energy efficiency can also help reduce your electric use, make your home more comfortable and improve indoor air quality.**

**Heating and cooling alone can account for up to 50% of your energy use.\* Ensure your home is operating efficiently.**

El Paso Electric incentives are only available through a Participating Contractor. The contractor list is available at [epesavings.com](http://epesavings.com) or call the Energy Efficiency Hotlines at (915) 255-4300 or (915) 521-4488.

**AIR INFILTRATION:** Seal, caulk and weatherstrip your home to reduce air leaks.

**CEILING/WALL INSULATION:** If your home isn't properly insulated, chances are much of that cold and warm air is escaping your home and taking your money with it.

**DUCT SEALING:** Seal leaks and holes and properly connect ducts to reduce energy waste.

**ENERGY STAR® CERTIFIED COOL ROOFS:** High-efficiency roofing materials reflect solar heat instead of allowing it to be absorbed into your building.

**ENERGY STAR CERTIFIED POOL PUMPS:** High-efficiency pool pumps are designed to save energy.

**ENERGY STAR CERTIFIED WINDOWS & SLIDING GLASS DOORS:** Install efficient windows and sliding glass doors to stop cold drafts and hot air from entering your home.

**EVAPORATIVE COOLERS:** In hot, dry climates installing evaporative cooling is a cost-effective and energy-efficient way to cool your home.

**SOLAR SCREENS:** Solar screens installed on south- or west-facing windows or glass doors block at least 65% of the solar heat gain.

**REFRIGERATED AIR UPGRADES & EVAPORATIVE CONVERSIONS:** A high-efficiency refrigerated air conditioner can provide greater energy savings. Your contractor can recommend a model that will offer maximum efficiency.

**WATER HEATER PIPE INSULATION:** Insulating the pipes and tank of an electric water heater prevents heat loss.

**MINI-SPLITS:** High-efficiency mini-splits can help you save energy and allow you to control temperatures in individual rooms.

**Energy efficiency incentives are available for the following measures:**

	Evaporative Cooling	Refrigerated Air
Air Infiltration		●
Ceiling Insulation/Wall Insulation	●	●
Duct Sealing	●	●
ENERGY STAR Certified Cool Roofs	●	●
ENERGY STAR Certified Pool Pumps	●	●
ENERGY STAR Certified Windows & Sliding Glass Doors	●	●
Evaporative Coolers	●	
Refrigerated Air Upgrades & Evaporative Conversions	●	●
Solar Screens	●	●
Water Heater Pipe Insulation	●	●
Mini-Splits	●	●

**You may qualify for even greater savings if you are income eligible.**

Size of Family	Annual Income
1	\$25,520
2	\$34,480
3	\$43,440
4	\$52,400
5	\$61,360
6	\$70,320
7	\$79,280
8	\$88,240

**200% HHS Poverty Guidelines or receive benefits from qualifying programs, such as food stamps, medical assistance or Supplemental Security Income.**
